DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/7/2003 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10, 23-38, 40-42, 44, 45, 47 & 63-68 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zouboulis et al (*Dermatology* 196) or Rosenfield (6004751) in view of Bryan (*Crit Rev Onc* 5(4)).

Zouboulis and Rosenfield teach cell cultures of sebocytes particularly taken from facial sebaceous glands. Zouboulis teaches cell culture of sebocytes dates to at least 1989. The references do not teach that the cells are immortalized, however at the time

the invention was made, it would have been obvious to immortalize the sebocytes of Zouboulis and/or Rosenfield because Bryan clearly teaches that cells in culture can be immortalized by SV40 and motivates one of ordinary skill in the art to do so because of the obvious advantages for study of having a cell line which does not die off. The method is not exclusive to Bryan and has been done for decades in scores of cell types. Given the breadth and success in the art of immortalization via SV40 (and other known immortalization techniques), there was clearly a reasonable expectation of success for one of ordinary skill in the art at the time the invention was made to make an immortalized human sebocyte cell line. It follows that the immortalized cell line, *per se*, would have been obvious at the time the invention was made.

Accordingly, the claimed invention was *prima facie* obvious to one of ordinary skill in the art at the time the invention was made especially in the absence of evidence to the contrary.

[T]he PTO can require an applicant to prove that the prior art products do not necessarily or inherently possess the characteristics of his [or her] claimed product. Whether the rejection is based on 'inherency' under 35 U.S.C. 102, on 'prima facie obviousness' under 35 U.S.C. 103, jointly or alternatively, the burden of proof is the same...[footnote omitted]." The burden of proof is similar to that required with respect to product - by - process claims. Quoting *In re Fitzgerald*, 619 F. 2d 67, 70, 205 USPQ 594, 596 (CCPA 1980) (itself quoting *In re Best*, 562 F.2d 1252, 1255, 195 USPQ 430, 433 - 34 (CCPA 1977)).

Note that MPEP § 706.3(e) states that:

"[w]hen the prior art discloses a product which reasonably appears to be either identical with or only slightly different than a product claimed in a

Art Unit: 1651

product-by-process claim, a rejection based alternatively on either section 35 U.S.C. 102 or 35 U.S.C. 103 of the statute is appropriate. As a practical matter, the Patent and Trademark Office is not equipped to manufacture products by the myriad of processes put before it and then obtain prior art products and make physical comparisons therewith. A lesser burden of proof is required to make out a case of prima facie obviousness for product-by-process claims because of their peculiar nature than when a product is claimed in the conventional fashion. *In re Brown*, 59 CCPA 1063, 173 USPQ 685 (1972) ; *In re Fessmann*, 180 USPQ 324 (CCPA1974)."
